

IAA 2016 – Individual Karosseriebau GmbH (IndiKar)

PRESS RELEASE

Hannover, 22.09.2016-29.09.2016

From 22nd to 29th September IndiKar Individual Karosseriebau GmbH (a member of the Welp Group from Georgsmarienhütte) had exhibited at the “Sächsischer Firmengemeinschaftsstand zur IAA” (Saxony communal company’s stand of the IAA) in Hannover. Along with nine other exhibitors, IndiKar particularly presented its latest hot-forming technology as well as its newest armouring techniques as used for their armoured vehicles.

Thereby IndiKar had established first contacts for opening up of new markets with the new hot-forming site launching in Zwickau in 2017. Hot forming of armour steel is a procedure that is barely being practiced in Germany up to now, making it a potential market for IndiKar and the brand of WELP Armouring.

Aside from these armouring topics, some current projects of our automotive branch were as well being discussed with our longstanding business partners.
